---> Comment Text :
Since the idea of Yucca Mt. was announced, I have followed what testing, what information, whatever has been made public about using this as a storage place. I am still 100% opposed to this area being used. I have a problem with the credibility of the scientist reports that come from those who work for the government. Too many previous lies have been told regarding the safety of what is being done at sites the federal government use. There are fault lines, There is a problem with water seepage, and now there is a problem with every terrorist in the world knowing that such a site is so close to the Las Vegas area. I own property on that side of town also and don't want to feel any more endangered than I already do. I have raised 4 children, 4 grand children and now have 1 great grand child. I want them all safe. Your proposal to bury waste of any kind there is unacceptable to me and my entire family. You can bet if its approved, me and my entire family will put our homes on the market and leave. I will not live
